

Dr Mat Cook: Research Group Leader, Northern Aquaculture, CSIRO Agriculture

Mat leads a group of 18 talented staff who deliver innovative solutions for the sustainable development of Aquaculture. Mat has dedicated the last 13 years to CSIRO, beginning his career in Tasmania before relocating to Brisbane with his family.

He holds a BSc (Hons) in Aquatic Toxicology and a PhD in Aquatic Animal Health.

His specific interests are in the sustainable development of Aquaculture with an emphasis on increasing animal welfare through novel disease detection and abatement technologies.

His reputation extends beyond Australia to Asia, Europe, South and North America where he is sought after for advice on a range of issues relating to Aquaculture.
